Partnership in Growth!

Crane Supply – Lambert Somec partnership dates back to 1969.

"Crane Supply's service excellence within the PVF sector, their **product knowledge** and exceptional fill rates were instrumental to our success during the construction of Sherbrooke University. Throughout the project Crane was easy to deal with, they understood their role and focused on offering value added service including **just-in-time delivery** and **MTR reports**. Also, they were very active on site, estimating and always trying to accommodate our demanding deadlines. I look forward to our future cooperation. Thank you Crane Supply!"

Michel Boutin, Lambert Somec
