## Partnership in Growth!

The Li Ka Shing Knowledge Institute is a new world-class research and education facility being completed at the St. Michael's Hospital in Toronto. The person responsible for its construction on time and on budget is Mr. Bruce Campbell, Project Manager at Black & McDonald.

"Crane Supply is **more than just a distributor**, it is our SUPPLY HOUSE OF CHOICE. Canadian regulations enforce mill certification for pressure-retaining components in boilers, pressure vessels and piping, and Crane Supply makes it easy! We are more than pleased with Crane's capability to provide **Mill Test Reports (MTR) with each delivery** of their PVF products. Crane Supply reliably comes through by getting material **on time**, even if it means bringing it from another of its locations to prevent back orders. Congratulations to Glen Kellaway and the entire Crane Supply team for their outstanding service."

**Bruce Campbell, Black & McDonald**
