Partnership in Growth!

"It's not often that partnerships last over 50 years. Especially business partnerships. This one has been going strong since 1956"

Currently, The Moncton Hospital is expanding its facility by constructing a new \$47 million ambulatory care centre that will provide services for 75,000 patients annually. Moncton Plumbing, one of the primary contractors responsible for building this expansion at The Moncton Hospital, has relied on Crane Supply to deliver essential package project solutions, including on-site delivery, MTR with each shipment, exceptional fill rates and service excellence. "This reliability is essential to finish projects on time, and to keep the cost within budget. And once again, Moncton Plumbing has placed its trust in Crane Supply. We look forward to the next 50 years."
